

The Walker Wayland Client Secure Area is an area specially designed for our clients. Our clients can upload confidential documents to their secure space on our website and also access their own confidential documents that we load for them such as trust deeds, resolutions and financial statements.

For example, if you like to send your MYOB files to us to enable us to prepare your annual accounts, you no longer need to copy it to a CD or a USB stick or email it to us, you simply login to the Walker Wayland Secure Area, click on upload files, select the path where your MYOB file is saved and click send.

To use this great feature, please [click here](#) to register or if you have previously registered and forgot your login details, please email mail@wwauckland.co.nz for your username and password.
